Patent Application
Docket #34650-00250USP1

ABSTRACT OF THE DISCLOSURE

A system, method and apparatus for establishing a
5 secure wireless radio communications link between two devices
that minimizes the exposure of sensitive information to
third party interception is disclosed. The secure link is
established by first establishing an infrared link between
the two devices for the exchange of sensitive information,
10 such as encryption information. Subsequent communications
would then have the benefit of encryption protection,
establishing the secure wireless radio communications link.
